Lisianthus

Double Flower

F1 Chaconne Series

The Chaconne series belongs to the mid-to-mid-late flowering group. It features large flowers with thick petals, resulting in excellent vase life. To prevent leaf tip burn and stem breakage, it's recommended to use less fertilizer for the Chaconne series. The White 3, Light Pink 2, and Pink 2 varieties boast particularly strong stems and require ample water for optimal stem height.

NEW

F1 Chaconne Wedding Light Pink 2

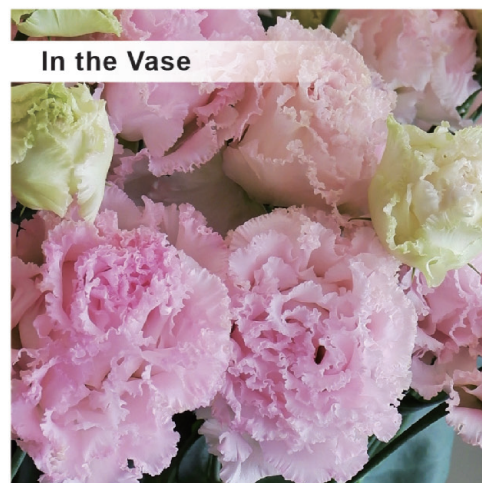

Translucent light pink petals reminiscent of cherry blossoms. Selected for ease of branch management and minimal physiological disorders, making it an easy-to-grow fringed variety. Avoid planting during high-temperature periods.

Check it in our You Tube!

F1 Chaconne Wedding Light Pink 2

The color of the flowers deepens after harvest. After harvest, the flowers undergo an enchanting color transformation. A gift that showcases nature's artistry, perfect for a loved one.

Double Flower

F1 Soiree Series

Our earliest flowering double series. Easy flowering even under low temperature condition. The flower size is medium to large. Avoid planting this extra early Soiree in hot periods; they quickly come into flower and stem length becomes short.

F1 Soiree White 1

F1 Soiree Pink 1

F1 Bolero Series

Early flowering and less susceptible to rosetting even under warm growing conditions. Importantly the shape of blooms is also stable under heat. Adaptable to different cropping schedules from winter to summer. Sturdy stems and good vase life.

F1 Bolero White 1

F1 Bolero Blue Picotee 2

F1 Bolero Blue Blush 1

F1 Bolero Green 1

F1 Mazurka Series

Effortless to grow and guaranteed to deliver an abundance of premium-quality produce. Produces second stems earlier than other varieties.

F1 Mazurka Wave White 1

F1 Mazurka White 2

F1 Mazurka Blue Picotee 2

F1 Romance Green Imp.

Large flowers. High temperature does not cause less petal count. Good branching and voluminous. It looks vigorous with strong and straight stems.

F1 Romance Green Imp. 2

F1 Polka Lavender 2

F1 Polka Lavender 2

Elegant lavender variety with large and full petals. The height is short but middle flowering and good for winterspring production.

F1 Minuet Series

They display many small double blooms with very attractive rose-like flower buds. Middle flowering speed
Apricot Rose grows slightly slower and taller than Dark Purple. White Imp. is renowned for its exceptional longevity.

F1 Minuet White Imp. 2

F1 Minuet Apricot Rose 2

F1 Minuet Blue picotee 2

F1 Minuet Dark Purple 2

F1 Allemande Series

Middle flowering, suitable for harvesting from summer to autumn. Large, showy flowers, prized for its ability to maintain its double form and produce strong, voluminous stems even in hot climates.

F1 Allemande white 2

F1 Allemande Light Pink 2

F1 Diamond Peach 2

Middle flowering, best suited for spring-summer harvest. Medium to large blooms on tall rigid stems. Excellent vase life.

F1 Diamond Peach 2

F1 Diamond Peach Imp.3

More rigid stem, taller than the former F1 Diamond Peach 2. Middle-late flowering. The shade of pink is slightly darker, and the two-tone appearance remains stable. Good branching habit.

F1 Diamond Peach Imp. 3

F1 Nightingale Series

Intense color, Nightingale has larger flowers than those of Nightingale Midi. These two varieties need good light condition for good color appearance. Nightingale Dark Purple with very attractive purple petals. Suitable for summer production.

F1 Nightingale 3

F1 Nightingale Midi 3

F1 Nightingale Dark Purple 3

F1 Polonaise Series

Middle-late flowering, small lovely rose-like flowers. The number of petals hardly decreases under hot conditions. It branches well and has a long vase life.

F1 Polonaise White 3

F1 Polonaise Blue Picotee 3

F1 Papillon Series

Middle-late flowering, excellent performance through summer to autumn with very strong stems and perfect vase life. The series forms numerous small-medium sized rose-like flower buds on the top of the stems. They open slowly, similar to rose blooms.

F1 Papillon White 3

F1 Papillon Pink Blush 3

F1 Papillon Rose Pink 3

F1 Purple Flamingo 3

Middle-late flowering. Large flowers with thick petals and long vase life, very vigorous growing and maintain good height. Pay attention to leaf scorch at the start of growth. It is also not well-tolerated in rosettes.

F1 Purple Flamingo 3

F1 Gavotte Yellow 3

F1 Gavotte Yellow 3

F1 Vintage Blue Picotee 4

F1 Vintage Blue Picotee 4

F1 Shallot Green 3

F1 Shallot Green 3

F1 Luna Rose

F1 Luna Rose 3

F1 Jasny Series

Best summer performer, good branching habit and produces strong and voluminous flower stems. Petals of Jasny White are thick and vase life is excellent.

F1 Jasny White 3

F1 Jasny Lavender 3

F1 Jasny Light Pink 3

F1 Jasny Pink 3

F1 Largo Series

Middle-late flowering, excellent performance through summer to autumn. It develops plants well and maintains good height and many branches. The most remarkable characteristic of the Largo series is its flowers. Larger flowers with unique rim colors will capture user's attention.

F1 Largo Pink Picotee 3

F1 Largo Blue Picotee 3

Single Flower

F1 Pucchino Series

Single small cup shaped flowers. Extraordinarily long vase life and unique thick and hard petals. It contain approximately 10% of off-color (pink/white flowers into Pucchino Mint and blue/white flowers into Choco and Prune.) The flowering speed of Mint Imp. 1 is early and that of Mint 3 is middle-late.

F1 Pucchino Mint Imp.1

Limonium

L. sinuatum

Sturdy Violet **NEW**

Extraordinarily early growing, heavy producer and well-suited for winter production, resistant to botrytis. Branches grow upright, creating an excellent shape.

Lisianthus

Limonium

Tanto Pink **NEW**

Slightly pale pink. This is a highly productive variety that produces a large number of stems from the first flush. It is recommended for summer plantings for the early winter harvesting, the sharply angled branches make it easy to harvest.

Matthiola

Delphinium

Jet Rose **NEW**

This variety has a reddish rose brush. Brush colour is dark and resistant to colour loss. The upright branches make it easy to harvest. It is also characterised by its low tendency to brush mis-shape.

Other-Cut Flowers

Pot & Bedding Plants

Sunday Violet

Standard violet color. Vigorous and easy to grow and manage. Produces a large number of branches and rounded bristles. Good workability due to its sharply angled branches. Excessive nitrogen can lead to excessive growth and brush disturbance, so fertilise management should be more conservative than usual.

Vegetables

Acute Series

As the series name suggests, the branch formation is very sharply angled and stems extend straight up. Stems rarely become entangled, making harvesting easier.

Acute Pink

Acute Lavender

Prime Violet

Early flowering and suited to winter production. Well branched with small side branches and its strong stems grow vertically. The crop is easy to harvest.

Merry Pink

Easier to grow and maintain volume than other pink varieties. Each voluminous stem features large, sturdy brushes.

Earth Pink

Earth Pink has big calyces which open well. It produces tall and very high quality stems that grow upright and straight into a perfect shape. Crops are easy to harvest and suitable for winter production.

Crystal Yellow

Striking bright lemon yellow cultivar with large, well-formed calyces, suitable for all seasons. Prone to botrytis, so good ventilation and prevention are essential.

L. sinuatum

Rose Wine

Early flowering, suited for winter forcing cultivation. Wide-opening calyces, straight stems. Vivid intense rose color.

Lisianthus

Limonium

Suai Pink

The plant is particularly strong in the pink varieties. You can continue harvesting the large cut flowers during the second and subsequent blooms. The color is a rose-ish pink. Please note that delaying the harvest will turn the brushes blue.

Matthiola

Delphinium

Amethyst Series

Excellent volume with large brushes. Luster Amethyst displays full opened calyces colored with shining bright purple. Lucky Amethyst has dark blue calyces. Their slow growth rate makes them well-suited for summer production.

Lucky Amethyst

Luster Amethyst

Other Cut Flowers

Pot & Bedding Plants

Vegetables

Pirika Purple NEW

This variety boasts a striking deep reddish-purple color. It has a good spread, multiple flower buds, and sharp-angled branching that makes harvesting easy. It also has strong fertilizer absorption, so it is recommended to use less fertilizer than usual for base dressing.

Violet Fizz

Large stems with many medium flowers. Summer is the best for growing this late-blooming variety.

Noble Violetta

Intense dark blue brushes, middle to late flowering speed, excellent summer performance, high quality stems.

Dynamic Violet

Intense violet color. Big flowers and thick stems make cut flowers look substantial. Maintains good stem length and branching even in hot climates. Late flowering, suitable for summer production.

Exotic Tall Blue

Middle-late flowering, suited for summer production. Produces high-quality stems and branches during both the first and second flushes. Apply less fertilizer and water as the growth is very vigorous.

Canyon Snow

The calyces fully open, forming well-shaped brushes. Heavy stems and branches grow upright and it is easy to pick them. Among white varieties Canyon Snow is relatively tolerant to Botrytis.

L. sinensis

Ever Series

Ever snow is pure white, slender silhouette, excellent for the mixed bouquets. Ever series offers wide range of planting schedule as it does not require much coldness. Ever Rose has the lowest requirement of cold temperature for flower initiation in our red varieties and it allows this variety an advantageous production with high quality flowers.

Ever Snow

Ever Rose

Bliss White

Just like Ever series, Bliss White does not require much coldness for flower initiation and the 2nd flush harvest is possible. Bliss white is early flowering and tall growing with its rigid flower stalks.

Cumulo White

Suitable for Summer production. Excellent flowers volume and disease resistance. The stems are quite hard and the voluminous stems are harvestable.

Lisianthus

Matthiola

All Double Spray & Standard

Spark Series(Spray Type)

All double spray Spark series is available as all double flowers without double single selection. Over 90% will be double flowers. Creamy yellow and white are available. Compared with Quartet White and Yellow 2, Spark White 2 and Yellow are about 10 cm taller but flowering is delayed by 10-14 days respectively.

White 2

Yellow

Arrow Series(Standard Type)

All double Arrow Series is now available in three varieties. Early Arrow White is earlier in flowering than the original Arrow White. Early Arrow White 2 blooms a little later than the original Early Arrow White, but the stem height is about 10 cm higher and the flower spike is tight. The flower color of these varieties is pure white. The level of firmness of the flower stems is sufficient.

GH=Green House

The description is made under Japanese circumstances and may not be adequate of different climate areas.

Comment	
I	Pinching timing: When very top 2-3 buds start coloring. To get height, never dry-out water during growing.
II	Early sowing may cause time lag in flowering. To get height, never dry-out water during growing.
III	Avoid sowing in hot period. Hot temperature may cause blasting

Spray

Quartet Series

Early blooming and sweetly fragrant. Beautifully branches, boasts strong stems - perfect for bouquets & arrangements. Top flower bud pinching is required to make a well-balanced spray formation.

Iron Series

Iron series is highly preferred because of its excellent quality. As in the name of Iron, the stems are like iron and very robust. It produces excellent tight flower spikes and the top of it does not stretch. Iron needs more water than other varieties to have marketable length.

GH=Green House

The description is made under Japanese circumstances and may not be adequate of different climate areas.

Comment	
I	Pinching timing: When very top 2-3 buds start coloring. To get height, never dry-out water during growing.
II	Early sowing may cause time lag in flowering. To get height, never dry-out water during growing.
III	Avoid sowing in hot period. Hot temperature may cause blasting

Delphinium

D. grandiflorum (D. sinensis)

F1 Morpho Series

F1 Morpho series is developed to improve characteristics of OP varieties while maintaining longer stems, earlier flowering, higher productivity, and stabler flower color under cold and cloudy conditions. Spurless florets open upright, ideal for bouquets.

F1 Bijou Series

The first world's full double sinensis. This variety boasts a more luxurious flower shape than single types, with densely packed, velvety petals that exude a strong presence. It's also known for its long vase life. This series is relatively easy to grow, but the key is maintaining consistent moisture by avoiding periods of drought or overwatering.

Aquamarine

Lapis Lazuli

Lavender Sapphire

D. belladonna

Waltz Series

After introduction, this series is well accepted and consumed worldwide. Waltz series is selected for larger single flowers and extremely high production. Clones are produced by tissue culture and performance and appearance are very uniform. This series keeps producing without dormancy and achieves higher production than other varieties.

D.elatum

F1 Ariel Series

Very early (earlier than Triton series) flowering. Unlikely to cause rosetting. They will show their great productivity especially when they are grown in winter production.

Blue

Light Blue

White Imp.

Magic Violet

F1 Triton Series

F1 Triton series is very uniform in size and color. Growing speed is early and production is high. Excellent stem quality with good shaped double flowers closely arranged on cylinder shaped spikes. Triton's tight spikes are slenderer than other D.elatum varieties. This supports economical transportation and various flower usages and more consumption. Triton Lavender has the biggest flower size of our entire Delphinium assortment.

Souffle Series NEW

MIYOSHI Original large variety. We recommend growing it under artificial lighting in a greenhouse to prevent leaf burn. Souffle Light Pink : A light pink color reminiscent of cherry blossoms, unlike any other variety. Souffle Ruby Red : Characterized by a deep, rich red color. Susceptible to petal scorching during high temperature flowering.

Light Pink

Ruby Red

Julie Series

Adaptable to various cultivation methods using a combination of artificial lighting and heating. Bears flowers with a diameter of approximately 5 to 6 cm. Early-maturing, therefore the cropping period is short and suitable for intercropping. Exceptional resistance to Fusarium wilt.

Amaranthus & Ammi & Carthamus

Amaranthus cruentus (Hot Series)

Hot series for sales from summer through late autumn. Amaranthus is originally from India and prefers warm and sunny conditions.

Hot Chili

Hot Biscuit

Lisianthus

Limonium

Ammi majus (White Lace Flower)

Economical crop popularly used as filler in bouquets, arrangements and decorations.

Matthiola

Carthamus tinctorius

Long vase life. Can be used in various floral designs, including bouquets, centerpieces, wreaths, and garlands. Can use in dried flower arrangements, adding texture and color to floral designs year-round.

Orange Red

Delphinium

Other Cut Flowers

Dianthus barbatus

Temarisou

Called Temarisou, Green Trick or Green Ball depends on the region. Ball form does not have any flowers. With such a characteristic, vase life is excellent and now essential for flower bouquet and arrangement. The flowering is forced by long day and high temperature. More than 10 stems are harvested by cultivating from autumn to next summer.

Pot & Bedding Plants

Vegetables

Cosmos & Gypsophila

Cosmos

Flowers bloom from mid-summer to fall with a short cropping product. Needs around 60-90 days from sowing to harvest.

Versailles

Picotee

Afternoon White

Pink Picotee

Red Illusion

Gypsophila paniculata Zinzi Series

Discovery presents abundant small florets with excellent vase life. The long side branches grow straight up from the base of the stem. Small and voluminous, extravagant florets. Titan has big voluminous flowers with earlier flowering cycles.

Zinzi Discovery

Zinzi Titan

Helianthus & Myosotis

Helianthus Full Double Series

Takes about 80 days from sowing to harvest. High rate of all double type flowers and fewer lost flowers.

Lemonade

Orangeade

Myosotis alpestris Nano Series

Myosotis is commonly known as a bedding plant. Nano grows slightly taller. Its stems and flowers are thicker and bigger respectively. This variety can be forced for winter flowering with the usage of heating.

Nano Blue

Nano White

Ricinus & Silene

Ricinus communis Mizuma

Unique flower arrangement material. Clear, bright red of Miyoshi selection.

Silene armeria Sakura Komachi

Small 1 cm across florets compose lovely 5 cm light pink clusters. Year-round sales are possible with heating and lighting.

■ Tweedia caerulea(Oxypetalum)

Pure Blue (Tanioka Pure Blue)

Soft blue color and rounded petals. Good yield. Upright type, then dense planting is possible to improve yield per area.

Pint White Double Mix /Blue Double Mix

Approximately 50% semi double, 25% double and 25% single flowers appear from both Pint White Double Mix and Blue Double Mix.

Pint White Double Mix

Blue Double Mix

■ Rhodanthe manglesii

Maculata Rose / Maculata White

Available in rose and white. Ideal for dried flower. Symbolizes purity, remembrance, and eternal love.

Dahlia *valiabilis*

Lavender Jade NEW

Flower Type: Formal Decorative
Produces medium-sized flowers that are less likely to open fully, resulting in excellent yield. In contrast to the similarly colored Moon Stone, it displays uniform coloration across both sides of the petals.

Jesse Rita Bicolor NEW

Flower Type: Formal Decorative
Excellent color stability for red and white bicolor type. Resistant to open center and petal burn, making cultivation easy. Buds well after pinching, resulting in high productivity.

Jesse Rita

Flower Type: Formal Decorative
Attractive blackish red color. The flower is medium-sized and smaller than Kokuchou.

Kokuchou

Flower Type: Semi-Cactus
Attractive blackish red and very large gorgeous flower.

Lisianthus

Limonium

Matthiola

Delphinium

Other Cut Flowers

Pot & Bedding Plants

Vegetables

Dahlia *valiabilis*

Lisianthus

Asahi Temari

Flower Type: Ball

Red color is stable throughout the year even under low light and temperature condition. Petals are thick and vase life is good. Excess fertilizer makes stems too thick.

Limonium

Nessyou

Flower Type: Semi-Cactus

Impressive flaming red variety. The flower size is middle and good cut flower variety. Under low light and/or cold condition, the color changes to red orange.

Mathiola

Garnet

Flower Type: Semi-Cactus

The color is stable throughout the year even under low light and cold condition. More heat resistant than Nessyou.

Delphinium

Red Stone

Flower Type: Formal Decorative

Come into flowering earlier than Asahi Temari with thinner but hardy stems. The color changes to orange under 10 degree celsius.

Other Cut Flowers

Moon Stone

Flower Type: Formal Decorative

Light lavender. Small flower and suited for arrangement with other flowers. The color is stable throughout the year.

Pot & Bedding Plants

Vegetables

Orange Stone

Flower Type: Formal Decorative
Strong flower petals extending the vase life.
Less open centers. Flower color may fade when
cultivated under the low light intensity condition.

Portlight Pair Beauty

Flower Type: Formal Decorative
An elegant mix of orange against white at their
tips. Bicolor is more stable than existing varieties.

Hamilton Jr.

Flower Type: Formal Decorative
Best selling Orange Dahlia in Japan. Sturdy
stems hold flowers very well.

Saisetsu

Flower Type: Formal Decorative
Flower size is medium large with good volume.
Flower color is pure white and popular for the
bridal use.

White Quartz

Flower Type: Semi-Cactus
Flower size is medium large with very hardy
stems. Flower color is pure white.

Dahlia *valiabilis*

Lisianthus

Yellow Quartz

Flower Type: Semi-Cactus
Cream yellow. Less susceptible to petal damages compared to yellow varieties in general. Less open centers.

Limonium

Pink Quartz

Flower Type: Semi-Cactus
The variety is characterized by its bright clear pink color with no bluish tone.

Mathiola

Rose Quartz

Flower Type: Formal Decorative
Medium - large flower size. Vivid rose color is stable throughout the year.

Delphinium

Mitchan

Flower Type: Formal Decorative
Best selling Rose Dahlia in Japan. Petals are thick.

Other Cut Flowers

Pot & Bedding Plants

Inca Rose

Flower Type: Semi-Cactus
Medium flower size. Less susceptible to open centered flowers with lighting.

Vegetables

Margarita

Flower Type: Formal Decorative

Medium flower size. Very productive due to its earliness. Under lighting, it is less susceptible to open-centered flowers.

Peach Primadress (TWU)	Multiple petals	H. orientalis hyb.	Pink	Fast	Middle
Black Swan(OYX)	Double	H. orientalis hyb.	Black	Fast	Middle
Grace Primadress(VFD)	Multiple petals	H. orientalis hyb.	White/Picotee	Fast	Middle

Growing Speed : Indication of the plant vigor. Flower bud initiation requires a period of low temperatures and it differs by variety.

Vegetables

■ Fragaria ananassa (Strawberry)

MIYOSHI has developed the private F1 seed strawberry varieties. We are the first company in the world to introduce our sweet and flavorful Japanese strawberry seeds.

MIYOSHI F1 SEED STRAWBERRIES ベリポップ Berry Pop

C

F1 SAKURA

Excellent sugar content and excellent harvest.
Medium and stable conical fruit can be cropped.

C

F1 HARUHI

The great combination of high sugar content and moderate sourness creates a refreshing flavor experience. High-cropping medium-sized fruits with hard skin.

Characteristics

Variety	Type	Earliness	Sourness*	Average Brix	Note
F1 SAKURA	Short Day	Early	Not sourer	12.4	10(lowest)-25°C(highest) would be enough for floral initiation
F1 HARUHI	Short Day	Early	Same/A bit sourer	12.6	10(lowest)-25°C(highest) would be enough for floral initiation

Compared with Benihoppe which is one of the most popular Japanese standard varieties

Wasabia japonica

Wasabi

Wasabi, Japanese horseradish, is now available. A paste made from the rhizomes is used as a pungent condiment for Sushi and other dishes. The stems, leaves and flowers can be also used in salads. Generally it requires a clear stream for its production but Orochi is growable in the ground. It takes one and half to two years to harvest the rhizomes after planted.

Mazuma No.1

Akaoni

Shogun

Mikado

Orochi

Characteristics

Variety	Color	Earliness	Size of Rhizome	Taste	Character
Mazuma No.1	Green	Late	S-M	Pungency with sweetness	Reliable Japanese standard variety
Akaoni	Green	Late	S-M	Pungency with sweetness	Easier to grow in cold water
Shogun	Light Green	Middle	M	Pungency	Tasty leaves, the strongest variety in our lineup
Mikado	Green	Early	L	Pungency but it doesn't long	Disease resistance
Orochi	Light Green	Early	S-M	Very pungency	Field Grown type. Stems, leaves and flowers can be used in salad. Plantable in a pot.

The whole information is based on Japanese climate and it can be changed under diferent environment.

Terms & Conditions of Sale

All seeds and plants sold by MIYOSHI & CO., LTD. (Seller) are sold on following terms and conditions.

1. Definition

- Goods define the whole products that Seller deals in plants, genetic material from ornamental plant varieties, including (processed) seeds, cuttings and plant material, as well as cultivation material and/or ornamental and (nutritional) horticultural plants as well as horticulture materials
 - Seeds indicate the whole seeds products Seller deals in.
 - Plants indicate the vegetative products such as cuttings, in-vitro plants, runners, roots Seller deals in.
 - Purchaser defines both the direct and the indirect other party or customer of Seller, including even if solely – a licensee of Seller.
 - Force majeure defines circumstance outside the control of Seller, foreseen or unforeseen at the time of conclusion of the agreement, which wholly or partly impedes or seriously hinders the implementation of the agreement by Seller, and also, in so far not yet included, crop failure, production of seeds of insufficient quality, diseases in the enterprise of Seller or its suppliers, wars or warlike conditions, riots, revolution, embargo, industrial actions, epidemics and pandemics and limitations/orders as a result thereof, transport problems, labor strikes, administrative orders and government measures, fire, water, frost or storm damage, disturbance in the supply of basic materials, water and energy, and lack of or late delivery by suppliers for whatever reasons.
2. All prices quoted are in Japanese yen and FOB Tokyo Japan. The prices are exclusive of the costs such as freight, phytosanitary certificate, certificate of origin, insurance or any other costs associated with the delivery of goods required by purchaser and the costs are for the purchaser's account.
 3. Purchaser shall with accuracy inform Seller of the order information by email including delivery address, name, customer number, telephone number, name of goods, quantity, and delivery date.
 4. Any goods shown in "Cut Flowers" and "Pot Flowers" sections of the catalog are for ornamental purposes. Seller shall assume no liability if Purchaser uses such goods for edible purposes.
 5. The actual goods may differ from the pictures shown in the catalog depending on the cultivation condition.
 6. All prices are subject to change without notice.
 7. Purchaser shall place an order by specifying the number of units which match or exceed the minimum number of units designated in the catalog.
 8. Payment is due in accordance with terms specified on invoice or proforma invoice.
 9. All sales are final unless the purchased goods are defective or the wrong goods are delivered. Upon receipt, Purchaser shall immediately make sure of the quality and quantity of the delivered goods. If there is anything wrong with them, Purchaser shall inform Seller accordingly within 7 (seven) days from the date of receipt. Any claims made thereafter shall not be accepted.
 10. The total liability of Seller for loss or damage is limited to the amount of the purchase price. Seller shall not under any circumstances be liable for any special, indirect or consequential loss or damage.
 11. All cultural and descriptive information provided by Seller is for the use as a guide only. All information in catalogs or pamphlets is based on Seller's experiences and trialing in Japan. Seller in no event accepts any liability for results that may vary due to different climate, growing condition or any other factors.
 12. Seeds count information provided for weight or volume should be considered as "approximate and guideline". It is variable in varieties and seed lots.
 13. Seller is allowed to make partial deliveries of seeds and plants and shall not be responsible for delays or for losses resulting from such delays. The delivery date of the ordered plants may vary between the goods due to the difference in producing area and development. Transportation and compensation are subject to the terms and conditions of the respective carrier. The shipment may fail to meet the Purchaser's delivery requirements due to the reasons of the carrier. If any troubles during shipment are found upon receipt of the ordered plants, including, but not limited to, rollover and freezing, Purchaser shall request the carrier for the witnessed inspection and immediately inform Seller accordingly.
 14. Seeds returned without written authorization shall not be accepted. Packages must be in the original and not opened even if return is accepted.
 15. All ordered goods may not be sent together due to the reasons that such goods are still on backorder or the shipment period has not arrived yet. The ordered goods may run out of stock before the shipment due to production reasons. Also, the shipment may fail to meet the Purchaser's delivery requirements due to weather conditions and force majeure. Any late deliveries shall not be covered under warranty.
 16. "Contract required" Mark
If Purchaser has an intention to order the seeds and plants with the "Contract Sheet" mark in the catalog, both Seller and Purchaser shall have a written contract in advance. Purchaser shall abide by the contract and use the purchased goods for the purpose of cultivation as cut flowers, pot & bedding flowers, vegetables, and fruits. Any acts deemed a breach of the contract such as illegal propagation and assign and transfer to the third party without Seller's consent shall be subject to the punishment stipulated in the contract or a civil suit.
 17. If Purchaser infringes Terms and Conditions of Sales, Plant Variety Protection and Seed Act and/or the contract, Seller shall suspend the business with such Purchaser and the shipment of all ordered goods immediately after such act of infringement is found. Also, Purchaser shall immediately pay all receivables to Seller, regardless of the terms and conditions of the designated payment website.
 18. Cancellation for the order for seeds: The request for the cancellation shall be made no later than the time when Seller starts to prepare for the shipment of such goods. Any request of cancellation thereafter shall not be accepted.
 19. Cancellation for the order for plants: Any request for cancellation after the start of production shall not be accepted due to the nature of made-to-order production.
 20. Cancellation and Change of Order Quantity
Once Seller accepts an order and starts the production for the order, the Purchaser's request for cancellation or change of quantity for the order may not be accepted.
 21. Seller's Responsibility for Seeds and Plants
Seller shall produce all and any seeds and plants with due care. However, by the nature of these goods, the total liability of Seller to Purchaser shall be, in principle, limited to the amount of the purchase price. Seller shall not under any circumstances be liable for the results arising from the Purchaser's cultivation works using seeder tape, pellet and other tools.
 22. Price and Consumption Tax
All unit prices quoted in the catalog are Japanese yen, excluding the consumption tax. When Purchaser specifies an address in Japan as the delivery address, the consumption tax at the time of shipment shall be added to the purchased amount and borne by Purchaser.
 23. Payment Procedures
In light of aiming to achieve the smooth business and payment, Purchaser shall accept the following conditions;
The business rule of Seller stipulates that Seller shall actively have a written contract or memorandum with Purchase to request Purchaser to make a payment based on the contract or memorandum by honest means. In the event that Purchaser becomes delinquent in paying long-term, Seller shall take stern actions on a legal basis against Purchaser in order to protect the impartiality of the business.
 24. Payment Methods
Payment shall be accepted by bank transfer to the following bank account or credit card. Any additional handling fees shall be borne by Purchaser.
MIZUHO BANK, LTD. [Bank Code: 0001]
SHINJUKU-NISHIGUCHI BRANCH [Branch No. 353]
1-25-1 Nishishinjuku, Shinjuku-ku, Tokyo JAPAN
SWIFT: MHCBJPJT Account No. 353-114225
 25. Issuance of Receipt
Seller shall not issue a receipt to Purchaser for the purpose of work simplification. Purchaser shall treat a receipt of bank transfer or postal transfer the same as the receipt issued by Seller. Purchaser shall directly request Seller to issue a receipt if it is required nonetheless.
